## THORACIC SERVICES

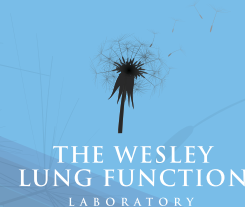

### The Wesley Lung Function Laboratory

This comprehensive, state of the art lung function lab has the ability to test for all respiratory disorders:

### All Lung Function Tests are Bulk Billed

#### Testing services include:

- Spirometry (before and after bronchodilator)
- Flow volume loops (before and after bronchodilator)
- Lung volumes and CO Transfer
- Bronchial Provocation (Mannitol)
- Allergen Skin Testing
- FeNO (for airway inflammation)
- High Altitude Simulation Test
- Six Minute Walk Test
- Nasal Resistance
- Cardiopulmonary Exercise Test (CPET)

### The Wesley Pulmonary Hypertension Unit

The Wesley Hospital is a designated Australian treatment centre for Pulmonary Hypertension with Federal funding for pulmonary vasodilator therapy, including parenteral, inhaled and oral vasoactive agents. The unit comprises our Thoracic Physicians, a specialist cardiologist and specialist RN.

### The Wesley Hospital Pulmonary Rehabilitation Unit 'Breathwise'

*Breathwise, a pulmonary rehabilitation programme based at The Wesley Hospital, focuses on a multi-disciplinary outpatient programme for patients with chronic lung disease, particularly COPD. The primary aims are to reduce the disability and handicap of chronic lung diseases and to restore patients to the highest possible level of independent functioning.*

### The Wesley Asbestos Research Group

Unique in Queensland, this group facilitates research and raises awareness of asbestos-related diseases both to the medical fraternity and the general community. This group was launched by Karen Banton, widow of mesothelioma victim and asbestos campaigner Bernie Banton.

## MEDICAL RESOURCES AND RESEARCH UPDATES

### Sleep and Thoracic Educational Resources for GP's:

#### GP E - Newsletters

Regular news articles with the latest in sleep and thoracic medicine. Join our mailing list through the website or view past articles online.

#### Educational GP Visits

Contact us for a visit from our Education Team. Our scientific staff will visit your practice with updates on current practice in sleep and respiratory medicine. Demonstrations of latest CPAP technology and lung function testing are available.

#### GP Educational Talks

TSGQ specialists provide regular dinners providing interesting and informative updates for GP's regarding sleep and thoracic medicine.

## DR ANDREW SCOTT

Dr Andrew Scott is a Thoracic and Sleep Physician plus CEO and Director of Thoracic and Sleep Group (QLD). He has 15 years experience in Sleep Medicine, having worked in major sleep units in Brisbane, Sydney and Cambridge (UK). He is Medical Director of The Wesley Hospital Pulmonary Rehabilitation Programme and has published in the areas of sleep medicine, infectious diseases of the lung, thoracic oncology, transplant medicine, cystic fibrosis, autoimmune lung disorders and thoracic surgery.

He has also practiced in the area of lung transplantation developing skills in complex interventional bronchoscopy including airway stenting and laser therapy. He is a Senior Lecturer in Medicine with the University of Queensland.
